Dear Parent,

MacKillop Catholic College has decided to implement Stile, a digital teaching and learning tool, into the science program for Years 9 and 10. We have also decided to register Science students into Education Perfect for the following programs:

Stage 1 Biology

Stage 2 Biology

Stage 1 Chemistry

Stage 2 Chemistry

Stage 1 Physics

Stage 2 Physics

Stage 1 Psychology

Stage 1 Psychology

Built by a team of Australian teachers and scientists, Stile and Education Perfect are designed to engage students in real-world science and help them build the skills they'll need to thrive. They are purpose-built to facilitate collaborative learning with a mixture of rich, interactive activities that go well beyond the curriculum while also reinforcing core literacy and numeracy skills.

Your child will be able to access Education Perfect and Stile online at school and at home.

Your child may have an Education Perfect and a Stile account that can be accessed at stileapp.com and educationperfect.com. I'd highly recommend logging in to them with your child to explore their work and any feedback they will receive from their teacher early next year.

We're incredibly excited about adding Stile and Education Perfect to our science program and look forward to further exploring how it can enhance your child's learning. Please direct questions to your child's science teacher if you have any questions.

Kind regards,

Roy Joseph
